

Sales Performance Review — FY 2025

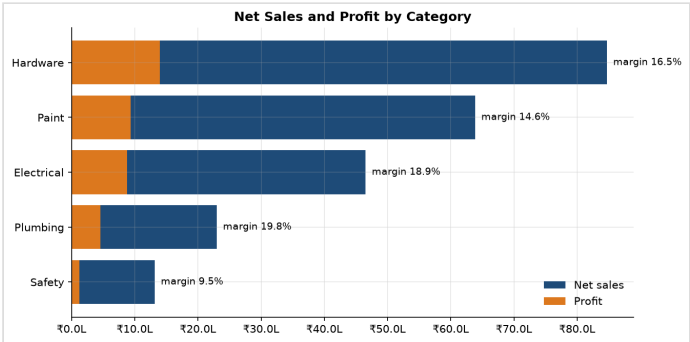

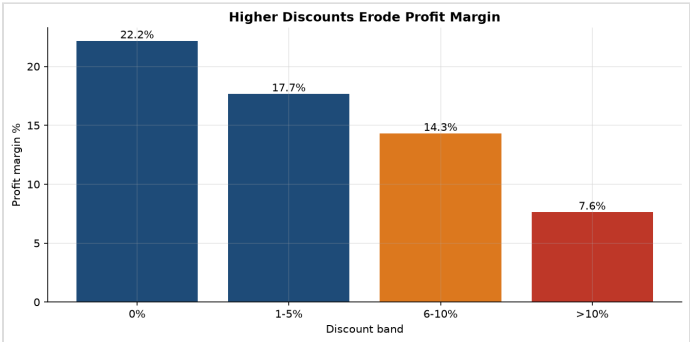

One-page management summary · Prepared from BCA_Data_Analytics_Test_Project.xlsx (Orders, Customers, Products)

Objective: Assess 2025 sales and profitability, identify risks, and recommend actions. **Scope:** 1,198 validated orders · 80 customers · 25 products · 5 salespeople · 8 cities.

₹2.31 Cr	₹37.9 L	16.4%	₹19,300	₹15.5 L	₹23.5 L
NET SALES	PROFIT	PROFIT MARGIN	AVG ORDER VALUE	DISCOUNTS GIVEN	OVERDUE RECEIVABLES

Key findings

- Discounts are the main cause of lost profit.** Margin falls from 22.2% on undiscounted orders to 7.6% when the discount is above 10%. **All 23 loss-making orders** had discounts above 10%, including one order at 35% that lost ₹4,578.
- ₹71.8 L (31% of sales) is still uncollected:** ₹48.3 L is pending and ₹23.5 L is overdue across 126 orders. Neha (29) and Sana (27) have the most overdue orders.
- Hardware drives volume (36.6% of sales), while Plumbing (19.8%) and Electrical (18.9%) earn the best margins.** Safety has a margin of only 9.5%. Product 4 is the 5th-largest product by sales but earns just 5.6%.
- Sales are steady but not growing.** Monthly sales range from ₹15.3 L to ₹22.1 L. May was the peak and July the lowest month (–25% vs June), and dips repeat in Feb–Mar and September.
- The customer base is healthy and diversified.** The top 20% of customers bring in only 29% of sales, and Retailers make up 51%. Varanasi is the largest city (₹41.2 L). Amit is the top salesperson (₹52.5 L, 16.7% margin).

Recommendations

- Cap discounts at 10%.** Anything higher should need manager approval. This alone would have prevented every loss-making order in 2025.
- Start a collections drive** on the ₹23.5 L overdue amount, beginning with the top 10 overdue customers (about ₹8.9 L). Link part of salesperson incentives to collections.
- Reprice or renegotiate supplier costs** for Product 4, 1, 2, 18 and the Safety range, and push higher-margin Plumbing and Electrical products.
- Run targeted promotions** in slow months (Feb–Mar, Jul, Sep) to smooth out sales.

Data quality actions

Issue	Action
O00056: product P999 does not exist, and sales values are blank	Removed
O00011: quantity is –3	Removed
O00041: customer C999 does not exist	Kept as “Unknown”
O00026: 35% discount outlier	Kept and flagged
O00076: status written as “pending”	Standardised

Suggested fix at source: use dropdowns for IDs and status, and block zero or negative quantities.
